

I made the check that you requested, and this is the result

The screenshot shows a web application interface for managing entities. The top navigation bar includes tabs for 'Integrazioni', 'Dispositivi', 'Entità', and 'Aree'. The 'Entità' tab is active. A search bar contains the text 'vima'. Below the search bar is a table with the following columns: 'Nome', 'ID entità', and 'Int'. The table lists 14 entities, all of which are 'Vimar Platform' devices. A filter menu is open on the right side of the table, showing three checked options: 'Mostra entità disabilite', 'Mostra entità non disponibili', and 'Mostra entità di sola lettura'.

PF All Cucina	cover.pf_all_cucina	Vimar Platform
Sx All Corridoio	cover.sx_all_corridoio	Vimar Platform
Sx All Soggiorno	cover.sx_all_soggiorno	Vimar Platform

later I saw that the github folder had been updated for about 1h, and I deleted the old folder and putted the new one, but with this version I have this error

The screenshot shows an error message box with the following text:

**Invalid config**

The following integrations and platforms could not be set up:
